Employment Equity & Diversity Consultative Committee
Terms of Reference (revision Jan 2013)

Purpose
This committee’s over arching goal is to proactively move the University of Regina towards becoming a representative and diverse workforce. As a committee we define a representative workforce as one where the demographic makeup of all occupational groups reflects the demographics from which each occupational group draws its members. We define a diverse workforce as one where all occupational groups include meaningful numbers of employees who may be considered unusual within that occupation’s usual constituency.

We recognize that achieving a diverse and representative workforce will require the development of a culture that welcomes and embraces diversity and that the necessary changes are only possible if all members of our community are involved. Thus, as a committee we consider ourselves accountable to the university community as a whole. We will consult with and make recommendations to any and all subgroups within the university community, including, but not limited to, designated target groups as defined by the Saskatchewan Human Rights Commission (women in under-represented occupations, Aboriginal people, persons with disabilities, and visible minorities); and other minority groups (e.g. francophones, sexual minorities); individual departments or faculties; individual occupational groups; entire bargaining units and the university administration.
